**Subject: Josam equipment as supply for Volvo Group AB**

To whom this may concern,

Since Josam has a frame agreement with Volvo Group AB, we recommend any Volvo entity to benefit from this agreement.

The reference number of this agreement is 18620 and covers wheel alignment sets and ADAS calibration (FLS LPOS calibration) as well as induction heating and collision repair equipment for trucks and buses.

Josam equipment has been used successfully within Volvo for many years and we do not hesitate in recommending it for alignment and maintenance works on our truck and bus chassis and wheel suspension.

Since the agreement is signed with Volvo Group it also includes Renault, Mack and any other brands belonging to the Volvo Group AB.

With Best regards
